Foundations of Facilitation Training

Foundations of Facilitation Training is a weekend-long intensive program designed to provide you with the skills you need to create powerful, transformative workshops. This training will provide you with the tools you need to enhance your confidence, create new depth to your presentations, and improve your ability to create relatedness with just about anyone. Over the course of the weekend, you will learn how to:

- lead workshops that leave your participants feeling touched, open, valued and nurtured
- create safe, non-sexual space to explore intimacy on both a personal and professional level
- generate an environment where women and men communicate more authentically and listen profoundly
- create a powerful relatedness with strangers quickly and easily
- be more open to others and able to give and receive comfortably
- create strong boundaries for yourself without shutting others down

You will also learn:

- tools for building a strong, intimate community
- advanced tools for handling rejection
- communication techniques that open people up to discuss intimacy, desires, fears and needs
